

HIGHLIGHTS

Valley Branch Watershed – Lake Levels, 2011

September 1, 2011

August's precipitation was 4.85 inches (at Lake Jane) which is 12% above average. The biggest change in the last month was a 1.18 foot drop in Long Lake followed by a 0.68 foot drop in Eagle Point. Water is now a foot above overflow in the West Lakeland storage site, so water should be running to the St. Croix River.

On a yearly basis, all lakes are over two feet higher than a year ago with Horseshoe Lake 7.17 feet above September 1 2010.

Storage values in the Project 1007 lakes showed an increase of 170 acre storage since last month, but a decrease of 2491 acre feet since September 1, 2010. In fact, this is the 4th month with negative storage values in the Project 1007 lakes.

	Acres	Overflow Elev.	Level	Acre ft. Storage		Total
Long Lake	90	937.50	939.68	-196.20	}	-335.00
