

HIGHLIGHTS

Valley Branch Watershed – Lake Levels, 2011

July 4, 2011

June's precipitation was 137% of average. There were no major changes in lake levels, with Horseshoe Lake's 0.84 foot increase being the largest. In fact, Horseshoe Lake is now slightly above overflow, but there isn't a substantial amount of water entering the upper storage site yet.

On a yearly basis, all lakes are higher, but Horseshoe is up 7.15 feet and Olson & DeMontreville Lakes are up 3.6 feet from a year ago.

Storage values in the Project 1007 lakes showed a decrease in storage of 185 acre feet since last month and a decrease of 2013 acre feet since July 1, 2010. In fact, this is the 2nd month with negative storage values in the Project 1007 lakes.

	Acres	Overflow Elev.	Level	Acre ft. Storage		Total
Long Lake	90	937.50	938.75	-112.50	}	-103.90
