HIGHLIGHTS  
 Valley Branch Watershed – Lake Levels  
 November 1, 2017

October's precipitation was just slightly below average (2.08 inches at Lake Jane), versus a Minnesota average of 2.43 inches. There were many rainy days but not a great deal of actual precipitation, at least in the metro area.

I couldn't get yearly comparisons since there were no readings on November 1 last year.

Storage values in the Project 1007 lakes on October 1 showed a negative storage of 146 acre feet. This is up from last month when there was a negative storage of 496 acre feet. These values mean little concern regarding lake levels.

	Acres	Overflow	Level Elev.	Acre ft. Storage	Total
Long Lake	90	937.50	937.83	-29.70	22.30
